

Supporting people to live independently is key to what we do at SENAD Community.

We met Antony at his previous residential care home placement and spent many weeks getting to know him while finding him his own home.

We found him the perfect home in the perfect location.

Since he has moved in his world has opened up tremendously and he's now enjoying activities he's wanted to do for years, like going to the gym.

I moved to my home in December 2023 with my new staff.

My staff help to look after me by making sure I have enough food in my house, they help me with my shopping as well and I like to go to Asda. They help me with my cleaning and remind me why I need to keep my house tidy.

I wasn't very happy in my old house as I wanted to have a house by myself and be independent. With my staff they help me to do this and I am really happy with my new life.

Antony is very happy with his placement with SENAD Community. He was previously living in a care home and he was very unhappy there. He loves living in the community and he can go shopping and be helped to prepare meals. He now has a much better quality of life.

The SENAD Community Team have been excellent in communicating with me during the preparation and transition of moving to his house.
