

Supporting quality family time is what we do at SENAD Community.

C lives with high levels of anxiety and struggles with crowds, new places, and new faces. She has a large family and expressed how much she would like a family day with her brothers and sisters. We worked closely with one of her sisters to arrange a date for a family day out at her favourite place, Drayton Manor Resort.

C finds great comfort in animals so the zoo was really exciting for her. She was also brave and enjoyed some of the rides. Her family said they all had a really good day with lots of laughter.

C felt so much inclusivity in the family network she had from the day out which allowed her to initiate a conversation with her elderly father about the day.

She is now looking to plan another family gathering at Christmas.
